

AMENDMENTS TO THE SPECIFICATION

Please amend the following paragraph(s) in the specification as follows:

In the paragraph beginning at page 17, line 9 (Paragraph [78]):

First, the plasma excitation means ~~(not shown)~~ is provided to at least one reaction cell 510, which is one supplied with a reaction gas, in such a way that an external RF power application device (not shown) is electrically connected thereto.

In the paragraph beginning at page 18, line 1 (Paragraph [82]):

Next, the radical generation means ~~(not shown)~~ only have to radicalize at least one reaction gas among the gases supplied from the gas supply means 300, and the radicalized reaction gas is continuously supplied to the inside of the particular reaction cell 510.
